Corporate Past Performance

CS applies its integrated Portfolio Management framework to address all aspects of our clients' program management needs. We specialize in delivering solutions that manage and improve operational excellence and alignment for our clients across all levels of their organization – enterprise, program, and project.

Our federal past performance includes:

For VA, we stood up the portfolio management office to address GAO High Risk List issues; provided analysis to support enterprise level strategies and portfolio management; conducted enterprise-wide organization studies to analyze current organization states and management systems and deliver recommendations; collected and analyzed data to facilitate business improvement and management of critical, and highly visible processes and systems; developed processes for monitoring and reporting progress to stakeholders; updated high level strategies and communications related to a wide range of topics from drug misuse to acquisition of health IT systems and products; and supported business transformation efforts including acquisition management modernization.

We are also supporting VHA in the management of the most significant redesign and transformation of its human capital management in the history of the administration. The scope of our support encompasses human capital legislation, policy, and oversight of the nation's largest integrated healthcare network. Other VHA efforts include technical writing and editing of congressionally mandated reports and project scheduling.
